

Strategy 11B

What is the value of $116 \div 2$?

Solution:

Half of 116 = half of 120 - half of 4
Subtract half of 4 from half of 120.

$$\begin{array}{c} \textcircled{120} \quad \textcircled{-4} \\ \diagdown \quad \diagup \\ 116 \div 2 = \underline{60} - \underline{2} \\ = 58 \end{array}$$

Division - Use Tens Or hundreds
