Unit 7 Decimals

Thinking Activity 7

Ajay bought 3 items, but he accidentally tore the receipt.
He paid with a $50 note and received some change.

Receipt	
Backpack	$ 21.50
Art Supplies	$ 14.70
Sharpener	
Total	

Based on the information given, each of the following statements is either **True**, **False** or **Not possible to tell**.
For each statement, put a tick (√) in the correct column.

Statement	True	False	Not possible to tell
(a) The cost of the backpack was $21 when rounded to the nearest $1.			
(b) The sharpener cost more than $10.
